Project Beta Overview

Project Beta is a strategic initiative aimed at building an advanced analytics solution to support organizational decision■making. This document outlines the project objectives, milestones, risks, and key deliverables.

1. Project Objectives:

- Develop a scalable analytics platform.

- Enable automated reporting and insights.

- Improve data accessibility across departments.

2. Key Milestones:

- Requirement Gathering – Week 1–2

- Architecture Design – Week 3

- Prototype Development – Week 4–6

- Testing & QA – Week 7–8

- Deployment – Week 9

3. Risks:

- Data inconsistency across sources

- Limited computation resources

- Model accuracy variance

4. Deliverables:

- Architecture Document

- Working Prototype

- Test Reports

- Deployment Guide
